Environment & Your Health is topic of March 13 Live & Learn lecture

WICHITA, KAN. – There are many connections between an individual’s health and the environment. Air emissions, for example, can cause additional problems for asthma sufferers as well as present long-term cardiovascular issues.

From noon to 1:30 p.m., Tuesday, March 13, learn more about how the environment influences health.

Elizabeth Ablah, PhD, MPH will present “The Environment & Your Health” at the Live & Learn Lecture at the KU School of Medicine–Wichita, 1010 N. Kansas.

Dr. Ablah is a Preventive Medicine and Public Health assistant professor. She does extensive work with the U.S. Environmental Protection Agency, most recently to create a rain garden along the Arkansas River to filter runoff and create a healthier river for the health of the public. She has special interest in the areas of health promotion, chronic disease prevention, access to health care, and nutrition and physical activity.

The lecture is free and open to the public.

For more information, call Public Affairs at (316) 293-2643. Audio of each Live & Learn lecture will be available at wichita.kumc.edu/livelearn within a week after a lecture is presented. A complete list of lectures is available on the website.

The KU School of Medicine–Wichita educates doctors for Kansas while improving the health of Kansans through research and innovation.
